DETAILED ACTION

Claim Objections

Claims 33, 54, 93 are objected to because of the following informalities:

Claim 33, line 1, replaced "The" with --A--.

Claim 54, line 1, replaced "The" with --A--.

Claim 93, line 1, replaced "The" with --A--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 33-37, 93-97 are rejected under 35 U.S.C. 102(e) as being anticipated by Maehara et al. (6,075,715).

Regarding claims 33-35, 93-95, Maehara et al. (Fig. 30) disclose an electrical circuit comprising: a power source (1); elements (C3, La, T1) can be broadly reads as a load; a switching bridge (Q1, Q2); a bridge capacitor (C1), diodes (D1, D2), wherein the connections between these elements are inherently disclosed.

Regarding claims 36, 37, 96, 97, wherein switches are bipolar transistors.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 52-62, 91, 92, 112, 113 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maehara et al.

Regarding claims 52, 53, 91, 92, 112, 113, Maehara et al. disclose the claimed invention except the specific load as claimed. However, such as load would have been considered a matter of design choice in the absence of unexpected results if not an intended use of the invention, wherein Maehara et al. disclose a specific load as discharge lamp.

Regarding claims 54-56, 58, 59, Maehara et al. disclose the claimed invention an output filter having the connection thereof. Maehara et al. (Fig. 30) disclose a electrical circuit comprising: a power source (1); a load (C3, La, T1); a switching bridge (Q1, Q2); a bridge capacitor (C1); a filtering capacitor (C4); diodes (D1, D2), wherein the connections between these elements are inherently disclosed. However, it is known in the art that addition of a known type filter will only enhance circuit operation, such as filtering out noise or improving output signal. As such, adding a filter to a circuit would have been considered a matter of design choice/engineering.

Regarding claims 57, 60-62, wherein switches are bipolar transistors.

Allowable Subject Matter

Claims 38-51, 55-90 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 38-51, 63-90, 98-111 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 38-51, 63-90, 98-111 call for, among others, a second phase of load (5), third and fourth switches, third and fourth diodes having the connection as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
